

Tarun Mahapatra

AI Engineer

PROFESSIONAL SUMMARY

AI Engineer with experience building GenAI-powered enterprise applications, AI orchestration systems, Knowledge Graph workflows, and scalable frontend architectures at Dell Technologies. Skilled in Python, Neo4j, RAG pipelines, Agentic AI systems, LLM orchestration, React, Angular, and micro-frontend architecture development.

RELEVANT WORK EXPERIENCE

SOFTWARE ENGINEER 2

Feb 2025 — Present

Dell Technologies

Bangalore, IN

- Contributed to the GenAI-powered response experience on the Dell Support homepage, developing scalable backend services in Python and responsive micro-frontend (MFE) components using .NET and Angular to deliver seamless AI-driven user interactions.
- Contributed to the development of a backend orchestration platform for Dell's Global Support ecosystem using Neo4j Knowledge Graphs, Retrieval-Augmented Generation (RAG), and Agentic AI architecture, enabling intelligent workflow orchestration across multiple LLMs for low-latency, context-aware responses.
- Implemented and optimized AI-enabled MFEs and product experience pages with a strong focus on accessibility, performance optimization, and component-driven architecture to improve usability and maintainability.

SOFTWARE ENGINEER

Aug 2023 — Jan 2025

Dell Technologies

Bangalore, IN

- Delivered end-to-end AI-integrated product features from wireframes to production, improving design-system consistency, response accuracy, and page load performance.
- Developed a React.js dashboard for visualizing job-run logs with reusable components, optimized state management, responsive layouts, and seamless API integration.
- Built and maintained a React-based internal automation portal, improving UI responsiveness, usability, and task execution speed.
- Provided SAP platform support including UI debugging, cross-browser fixes, and frontend-backend integration issue resolution.

SUMMER INTERN

May 2022 — Jul 2022

Dell Technologies

Bangalore, IN

- Developed a Python + OpenCV PDF data extraction tool with a clean, responsive HTML/CSS/JavaScript interface.
- Organized internal networking events and collaborated with design/frontend teams to enhance internal tools.

WINTER INTERN

Jan 2023 — May 2023

Dell Technologies

Bangalore, IN

- Migrated an internal tool from Python/React to Java Spring Boot + Angular, refactoring UI into modular components and improving routing and responsiveness.
- Created structured, form-driven Angular UIs with validation and integrated secure APIs for form submission and workflow tracking.

EDUCATION

BACHELOR OF TECHNOLOGY (B.TECH), COMPUTER SCIENCE & ENGINEERING

Jan 2019 - Dec 2023

Kalinga Institute of Industrial Technology (KIIT)

Bhubaneswar, India

- CGPA - 8.97

TECHNICAL SKILLS

React.js, Vite.js, Angular, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive UI/UX, Component-Driven Architecture, SPA Development, REST API Integration, Micro-Frontend (MFE) Architecture, Performance Optimization, Python, Flask, Java Spring Boot,

Neo4j, RAG (Retrieval-Augmented Generation), Agentic AI Architecture, MCP (Model Context Protocol), LLM Orchestration, Prompt Engineering, Vector Databases, Supabase (Auth, DB, API), SQL, MongoDB, Selenium, Git, Linux, SAP BASIS.

LANGUAGES

English(*Fluent*), Hindi(*Fluent*), Odia(*Native*), Bengali(*Fluent*).
